

NOTICE OF ROADWAY IMPROVEMENTS

ALCOSTA BOULEVARD PAVEMENT RESURFACING PROJECT

(FROM BOLLINGER CANYON ROAD TO CROW CANYON ROAD)

Planned Construction Period: July to November, 2015

The construction of the Alcosta Boulevard Pavement Resurfacing Project is scheduled to begin within the next two weeks. The pavement resurfacing work is planned to be constructed on normal working days between the hours of 8:00 a.m. to 5:00 p.m.

The proposed improvements will include: asphalt concrete pavement rehabilitation; subgrade stabilization; concrete curb, gutter, sidewalk, driveway, and curb ramp replacements; installation of drilled piers and grade beam; installation of edge subdrain; adjustments of survey monuments and utility structures to grade; and installation of pavement striping and markings. Construction phase of the project is scheduled for completion by November, 2015.

In order to complete the proposed improvements, lane closures and traffic controls will be established. These traffic control measures will temporarily reduce the width of the roadway to a single lane in each direction during certain hours. Additionally, at different stages of construction, various portions of the roadway between Norris Canyon Road and Bishop Ranch 15 will have 24-hour lane closures for days; however, the Contractor will be required to maintain access to driveways and cross street intersections.

The City asks for your cooperation and consideration while construction is underway. Please drive carefully through the construction zones. While the project has been planned to minimize impacts to the traveling public, some construction impacts and inconvenience cannot be avoided. As with any major roadway construction, traffic delays and temporary lane closures should be expected.

The City has contracted with RGW Construction, Inc. of Livermore to perform the roadway improvement work. The following contact information is provided in case you have questions or concerns regarding this project:
